Subject: Postscript Image quality
Posted by IDLmastertobe on Thu, 18 Aug 2005 03:34:04 GMT

Hi, I am trying to output a 3D image file in Postscript, but for some
reason my output color image does not appear in its original color. The
colors turned pinky. The following are part of my code:

SET_PLOT, 'ps'

DEVICE, file=filename, /color

; Write the image to the file:
;TV, image3D, TRUE=1
; Close the file:
DEVICE, /CLOSE
set_plot,'win'

If someone could please let me know what I did wrong, that would be really
appreciated. Thanks.
