Subject: Re: New Tabbing Functionality in IDL 6.2
Posted by David on Wed, 17 Aug 2005 18:02:08 GMT

David,

This looks to me like a bug rather than intended new functionality. The
new widget tabbing functionality was added in 6.1, and I don't see any
info in the 'What's New in 6.2' docs about widget tabbing.

Unfortunately, there doesn't seem to be a workaround for this.

Dave
