Does SYSTIME no longer work under IDL 4.0? (It does at least with IDL 3.0 on a Windows NT, with IDL 3.6 under SunOS 4.1):

```
Idl_s2: time = systime(0)
Idl_s2: print,time
Tue Jun 13 13:10:05 1995
Idl_s2: day = strmid(time,0,3) & print, day
Tue
Idl_s2: month=strmid(time,4,3) & print,month
Jun
Idl_s2: dayn=strmid(time,8,2) & print,month
Jun
Idl_s2: hour=strmid(time,11,2) & print,month
Jun
Idl_s2: hour=strmid(time,11,2) & print,hour
13
Idl_s2: min=strmid(time,14,2) & print,min
10
Idl_s2: sec=strmid(time,17,2) & print,min
10
Idl_s2: sec=strmid(time,17,2) & print,sec
05
Idl_s2: year=strmid(time,20,4) & print,year
1995
```
