Subject: Re: How to make GIF file (2) ?
Posted by bleau on Mon, 12 Jun 1995 07:00:00 GMT

Sorry, folks. I just read a few more messages and realized you'd answered my questions. The answer being:

```
 SET_PLOT,'Z'
 PLOT,X,Y
 A=TVRD()
 WRITE_FILE,'A.GIF',A
```

This will plot values in Y against values in X and write them out in GIF format. I just tried it in a batch job, and it works nicely. Success!

Thanks to everyone who responded about using Z buffer, especially Robert M. Candey (Robert.M.Candey@gsfc.nasa.gov), Mark Rivers (rivers@cars3.uchicago.edu), Jason Mathews (mathews@bolero.gsfc.nasa.gov), and H. Ian Novack (ian@gomez.jpl.nasa.gov).
