Reading RSI-supplied code is always illuminating, in
an odd sort of way, isn't it? :-)

OK, find this line in the DEMO_DRAW:

```
oWindow->Draw, oView
```

And after it, try this:

```
clipboard = Obj_New("IDLgrClipboard", Dimensions=[4,3], Units=1, $  
    Resolution=[2.54/300., 2.54/300.])  
clipboard->Draw, oView, Filename='myfile.eps', /PostScript, /Vector  
Obj_Destroy, clipboard
```

But, I agree with Mark. I don't think it has much of a chance
of actually working.

Cheers,

David
