Hello Group,
Thanks for providing advice from time to time.

I am outputting data to files through my program. I find that the data
automatically shifts to the next line after some point.

ex: array = [2, 3 4, 5 , 6, 7, 8, 9]

after outputting, the file looks like this:
2, 3, 4, 5, 6
7, 8

I want 7, 8 to appear on the same line otherwise my purpose in defeated
.

What's going on?

Thanks,
Pravesh
