Well, it is good to know \*someone\* is reading those stories. :-)

I have a new web statistics package I've been using, and  
I am greatly dismayed to learn that half my traffic is coming  
to my site from Google's picture search feature. The search  
string is using something like "Munich+Octoberfest+Girls". I've  
gotta get more sex on there and less information. :-(

Cheers,

David
