Subject: overlaying graphs on top of maps

Hi guys,

I'm trying to overlay several graphs on top of a map projection in
order to show varying degrees of pollution in different parts of the
globe.

Out of naivety or optimism I tried using OPLOT although I got the
error;
% OPLOT: Value of Latitude is out of allowed range.

Could someone give me a clue about how to go about doing this at all? I
have a sneaking suspicion that someone will say Object Graphics!

Thank you!

Martin..
