---

```
[sukesh@isdlinux call_exeternal]$ gcc -o idl.new $BINDIR/main.o  
$LD_FLAGS
```

```
/usr/local/rsi/idl_6.1/bin/bin.linux.x86/main.o(.text+0x31a) : In
```

```
function `main':
```

```
: undefined reference to `IDL_Runtime'
```

```
/usr/local/rsi/idl_6.1/bin/bin.linux.x86/main.o(.text+0x33d) : In
```

```
function `main':
```

```
Hai,
```

```
These are the errors i got when i worked with calltest.c program in  
RSI/IDL/external/callable/
```

```
: undefined reference to `IDL_DEclient'
```

```
/usr/local/rsi/idl_6.1/bin/bin.linux.x86/main.o(.text+0x357) : In
```

```
function `main':
```

```
: undefined reference to `IDL_Main'
```

```
/usr/local/rsi/idl_6.1/bin/bin.linux.x86/main.o(.text+0x379) : In
```

```
function `main':
```

```
: undefined reference to `IDL_Main'
```

```
collect2: ld returned 1 exit status
```

```
Regads,  
Prahlaad V
```
