
Subject: GDL installation for Ubuntu Linux
Posted by [rmw092001](#) **on** Thu, 03 Nov 2005 12:45:40 GMT
[View Forum Message](#) <> [Reply to Message](#)

some information for compiling GDL0.8.11 Gnu Data Language on
Ubuntu Linux (Debian).
system is Kubuntu (Ubuntu with KDE desktop, 'hoary')

for GDL libraries, plplot, gsl, readline etc., there are precompiled
.deb files at e.g. <http://packages.ubuntu.com>, install with 'dpkg'.

compiling GDL also needs many 'development files',
[filename]-dev.deb and [filename].deb for all libraries,
e.g. xlibs-dev_6.8.2-10.1_all.deb and xlibs_6.8.2-10.1_all.deb

file libplplotcxxd.so.9.1.0 is missing, it can be
installed from libplplot-c++9
it could also need symlinks, e.g.
sudo ln -s /usr/lib/libplplotcxxd.so.9.1.0 /usr/lib/libplplotcxxd.so
(maybe /usr/local/lib instead of /usr/lib)

xlibs-static-dev_6.8.2-10.1_i386.deb
zlib1g-dev_1.2.2-4ubuntu1.2_i386.deb

(list includes e.g. ImageMagick files,
doesn't include some files maybe already installed,
also there are probably newer copies of files)

this is for ./configure --with-hdf=no --with-hdf5=no --with-Magick=no

then 'make' to compile GDL...
