Does anyone know a way to make a multi-surface plot
in IDL?

We have 4 2D arrays z1(x,y), z2(x,y), z3(x,y) and z4(x,y),
and we want to plot all 4 surfaces in one plot. These are
surfaces at different height. It would be interesting to
plot them together in one plot so that people can compare
them.

Thanks in advance.

Cheers,

J. Xu
