Hi All,

I was wondering how I can extract all but a constant string from an
array of strings?
basically, I have an array of filenames with a particular directory
prefixed to each of the filenames like so:

files =
 ['/some/constant/directory/file1','/some/constant/directory/ file2',
etc.]

and would like to have just an array of the filenames without the
prefixed directory name so that the result looks like:

files = ['file1', 'file2', etc.]

any ideas?

Cheers,
KL
