Subject: Best platform for IDL 6.2?

Posted by bas on Wed, 16 Nov 2005 02:15:58 GMT

Hi group:

I was curious what platform seems to be the best for running IDL. I
have read some of the topics and it seems some platforms have problems.

Currently I run a Apple with OS10.4. I was thinking of upgrading to a
Sun or SGI workstation. I just wanted some opinions and any
experiences you have had with IDL on your platforms.

Thanks
bas
