Subject: Changing tag definition/type

Hi everyone,

I've seen discussions on adding and deleting tags to a structure but
haven't yet come across one about modifying structure tags (without
having to delete and create it again with the new properties). Is there
a way I can do this? (for e.g. I'd like to change a tag originally
defined to be a 1-d float array to a 3-d string array).

Thanks,
KL
