---

Hello all,  
I have been trying to plot 2 x-axes on an image using the iimage tool in IDL version 6.1. I can manipulate the bottom axis, but I can't (don't know) seem to plot an axis on the top of the image. Any ideas? (Note, I have to use itools because I am doing a crapload of things to the image, not possible otherwise)  
Alvin
