How about using device coordinates

```
scale=0.5  
pos=CONVERT_COORD(10,10, /data, /to_device)  
XYOUTS, pos[0], pos[1]-!d.y_ch_size*scale, /device, '*', align=0.5
```

you might need to modify scale, as the character might not be vertically centered

Or alternatively if all you want to do is put a symbol at (10,10) then use the PLOTS command

```
PLOTS, 10, 10, psym=2
```
