Subject: Cursor in IDL under Mac OSX 10.4
Posted by jean-claude.bouret@oa on Mon, 19 Dec 2005 17:02:23 GMT

Hi All,

I'm using IDL on my power Mac (OSX, 10.4) and I'm having trouble
getting the cursor command work.
When I use cursor and click on the graphic window, it seems like the
program is waiting forever for me to click. Does anybody know how to
fix this?
Thanks,

  JC.
