Subject: Re: IDL AND CORBA
Posted by peter.albert@gmx.de on Mon, 02 Jan 2006 12:17:48 GMT

Hi Anto,

the answer depends on which list of acronyms you are using. If your
list says

IDL: Interface definition language

then the answer is that "CORBA uses an interface definition language
(IDL) to specify the interfaces that objects will present to the
world." I have no idea at all what CORBA and this IDL is about, the
above is just a cut and paste from http://en.wikipedia.org/wiki/CORBA.
However, with this acronym's long word equivalent you are absolutely
wrong in this newsgroup. Here, IDL stands for Interactive Data
Language; it's a programming language especially useful for the
analysis of scientific datasets. No CORBA around, as far as I see.

Cheers,

   Peter
