Note that my script contains a fatal flaw.

Use the following instead:

```
sed 's;^\(%%Title: *\).*$\1Created by MAKE_TEST_PLOT_27, 11/1/06,  
original name: fred.ps;' < original.eps > original-withtitle.eps
```

(I tested on a file without slashes in the new title, and then replaced
my title with the one you gave).

Maarten
