No need for such terse language in this newsgroup. This forum was created to be and still serves as a vehicle for exchanging information and posting queries related to the PV Wave and IDL programming environment. This would then perhaps permit someone to learn about IDL and PV Wave quickly without reinventing the wheel.

Therefore, no matter how simple or complex an inquiry may be, it serves to educate those who are unfamiliar, and likewise, elicit a correction, suggestion for improvement, or disagreement from someone who is a self-proclaimed expert on the topic. And as for those who are disinterested, reach for the "n" or the "K" key or better yet unsubscribe.
