I don't know how to do this withing IDL. I would love to, having a bunch of "Graphics produced by IDL" open in gv isn't helpful.

If you are on unix/linux/macosx, you can try the following (all on one line):

```
sed 's/^\(%%Title: *\).*$/1Created by MAKE_TEST_PLOT_27, 11/1/06,  
original name: fred.ps/' < original.eps > original-withtitle.eps
```

(wrap it in a spawn command, using dynamic titles, and filenames etc).

Maarten
