Subject: Web Page Update
Posted by David Fanning on Wed, 11 Jan 2006 18:11:10 GMT

Folks,

I have been putting in long hours the past several days
updating my web page. It is not completely finished yet,
but I can see the light at the end of the tunnel anyway.
The changes *should* make it easier to update in the future.

Although I am testing as I go, there will inevitably be
errors and mistakes. If you happen to be on a page and
notice an error, please know that I am *compulsive* about
fixing these kinds of problems. Please let me know about it!

Random page checks are passing validation, which only
serves to increase my anxiety that something terrible is
waiting to happen. :-(

Also, please know that the page looks more like I intended
it to look in Firefox or Opera, or in almost ANY browser
other than Internet Explorer. :-)

Thanks for your help.

Cheers,

David
