That's it David, I think that they really don't want to improve IDL to
the point where it could be today. My first encounter with this was
with a rountine called LEGEND. I couldn't believe that it was so hard
to put a legend on a plot. I called RSI and someone called James (nice
guy) sent me an unofficial routine called LEGEND. It works but it is
not a part of the IDL routines.
Let's just say that my expectations for IDL, not being opensource, was
different.
Now I am grappling with getting my hardcopies to look like the ones on
the screen.
I don't like to quote our esteemed governor of CA, but it works so well
here:
I'll be back!!

Cheers,
Sheldon
