Subject: converting window into a image
Posted by CD on Tue, 17 Jan 2006 19:41:23 GMT

hello,

i am a novice with IDL, so wanted some help.

I used the window and tvscl to display a couple of pictures in the same
window in a particular order. Now the way these images are displayed in
the window, i want to copy the entire thing into one image. so that
that image when opened using a image viewer will show those pics the
same way as in the window of IDL.

thnx

cheers,
-cd
