Hooray!!

OK, on to IDLWAVE! Hope you guys don't mind me asking questions on this newsgroup. I've heard people here are tolerant of newbies. :-)

Cheers,

David

P.S. On a sadder note, I'm fooling around with this because I can't really concentrate on anything else. My office companion and friend for the past 12 years is having seizures this morning, and the day I have been dreading for a while now can't be far off. I'm not sure I can write IDL programs without this dog at my feet.
