Thanks for the tip! I've been wanting this for ages.

For some reason, Shift doesn't work as a scroll modifier for me under OS X (10.4.4). I changed all instances of 'Shift' to 'Ctrl' and that works fine.

Also, I found my up/down scrolling was reversed in text widgets, so I interchanged <Btn4Down> and <Btn5Down> in the last two lines of your .Xdefaults code

Cheers,
Nathaniel
