Hi~ all~!

I need to express v vector on y-title.

(Vector representation when we handwrite it on the paper)

I know textoidl. But I could not display the character through it.

Please let me know how to express that special character.

Thank you~

like this~

```
----->
v      v
v      v
v      v
v      v
  v    v
    vv
    v
```

I think textoidl is not enough to express all that I want.

Is there any better procedure to express special character?

And where can I learn the method to plot that characters?

Please let me know any website or book~~

Best wishes, [*_*]
