Hi,

I am trying to use annotate.pro, and upon compilation I get the following errors:

```
st.linestyle_id = CW_BSELECTOR(junk, LABEL_TOP = 'Linestyle:', $
                                ^
```

% Syntax error.

At: /usr/local/lib/idl/lib/annotate.pro, Line 1194

```
uvalue = '@Rst.p(13) = ev.value + 3')
          ^
```

% Syntax error.

I have taken a look at the code, and it looks perfectly normal.

What's up doc?

Thanks a lot in advance,
