Subject: Arrays merging

Hello, I have an easy question. I have two arrays:

help, array1
help, array2

ARRAY1   STRING   = Array[15, 4]
ARRAY2   STRING   = Array[15, 6]

I need to merge these two arrays into 1. I'm using:

Array3 = [array1, array2]

But it doesn't work, since the dimensions do not agree. How can I do to
concatenate these two arrays? How can I fill with zero values the
array1 to match it with array2??

Thanks!
