Subject: Re: Scope_VarFetch Bug or Feature?
Posted by retsil on Wed, 15 Feb 2006 01:52:05 GMT

I think that Scope_VarFetch certainly opens up a lot of possibilities.
At first I thought that it was just a hack tool for IDL, but it
actually has some legitamite uses.

For example, I use Scope_VarFetch to bring DICOM images and object
properties into the context of a procedure.
