Rick,Karl, Dick

Thank you very much for your \*valuable\* support.

I have find out a temporary solution. In this solution i am using JAVA, JAI and JAVA3D and \*of course\* IDL.

I have used IDL java bridge for this application. In my application i am rendering stereo on Java's window. For rendering I am passing my data from IDL.

And of course this a temporary solution. It will be very nice if RSI can provide this facility in IDL's future version.

As Rick has said that Journey is more \*enjoyable\* rather than destination which is actually true.

Rick - If you can provide me a code and circuit diagram , then it would be very helpful. Awaiting for your reply.

-Chintan
