Hi comp.lang.idl-pvwave

I have this need to place coordinates, like RA, DEC (astronomy images) at regular intervals in the x and y axis. My problem is basically this:

say you have `plot,findgen(10)`, I want to put major tick marks at user define intervals, say for e.g, at 1.125, 2.125, 3.125,...etc. How do I do this? Appreciate any help. Thanks

Alvin
