This error is not clear to me when I compile a PRO on a Window NT platform.

```
IDL> .run s:\idl\mc_sect
% Compiled module: GVAR_NAV.
% Compiled module: READ_KDF.
% Compiled module: READ_MCDATA.
% Compiled module: GET_GVAR.
% Compiled module: READ_MY_GVAR.
% Compiled module: LONG_FILENAME.
% Compiled module: LONG_FILENAME.
    WIDGET_CONTROL, text5, SET_VALUE="
        ^
% Program code area full.
% 2 Compilation errors in module MCSECT_EVENT.
```
