Hello,

In regards to the post by from:

greg ushomirskiy "typesetting math in IDL plots"

Date: Fri, Oct 3 1997 12:00 am

He was asking about displaying equations in ps output. The links from the responses are now dead, but I was wondering has there been anything new that has come along to do this? I know of TeXtoIDL, but that gets rather complicated if you want to put in some partial derivatives and "mean bars". Any information would be helpful. Thanks for the help!

Jon
