I can't explain exactly *why* you are getting the results you are, but I do know there are problems with saving and restoring objects. It's one of those things that you either solve, without understanding why, or you give up and figure out another technique for doing what you want to do.

I suspect you might have better luck with cloning the object before you save it:

http://www.dfanning.com/tips/copy_objects.html

At the very least, it will give you something more to think about while you are scratching your head over this. :-)

Cheers,

David
