David, I actually meant 4000. :)

At least this is the number of lines in my file (I wrote the help,
/routines output to a file)

I checked the ENVI help, but there are function in that list that is
not in the help. For instance:

DISP_LINK_DISPLAYS

There is no help for that function/procedure under ENVI Help.

I was hoping that those functions at least could have a single help, or
just a description...

Thank you for replying.
