Subject: Re: zoom screen id on envi_display_bands
Posted by Jeff N. on Tue, 28 Mar 2006 18:47:06 GMT

Seems to me like you answered your own question, or am i missing something?? The w1 keyword to envi_disp_query seems to give you an array of ID's for the image, zoom, and scroll windows, so if you do something like this:

envi_disp_query, dn, w1=wids

wids[1] is the zoom window id.

That's from the help file for envi_disp_query. Did you try that and it not work?

Jeff
