Subject: Re: map\_set, !map, !x, !p.position (and behind this curtain, !x.\*) Posted by MarioIncandenza on Wed, 29 Mar 2006 20:05:13 GMT View Forum Message <> Reply to Message

Jan,

It's back up. I don't want to post to group because it's ~350 lines long. The file on the FTP site has all of the MAP\_SET auxiliary routines, which are unmodified, as well as the MAP\_SET\_HACK routine, which is a substitute for MAP\_SET. You could put just this routine into a file, but then you have to compile MAP\_SET explicitly to use MAP\_SET\_HACK.
