Jan,

It's back up. I don't want to post to group because it's ~350 lines long. The file on the FTP site has all of the MAP_SET auxiliary routines, which are unmodified, as well as the MAP_SET_HACK routine, which is a substitute for MAP_SET. You could put just this routine into a file, but then you have to compile MAP_SET explicitly to use MAP_SET_HACK.
