: Hi. I have two questions (that were not answered in the FAQ):

- : 1. How do I declare global variables in IDL. I am used to writing in C and other such languages. Am I missing something, or shoul
- : 2. How do I write programs in IDL using entities similar to C header files? I'd like to do things with some structure (not everyth

First of all, you need to get a text editor that:

- 1. Wraps text.
- 2. Does not have a 128 character line limit.

Almost any text editor will will meet these requirements.
