Subject: Re: IDL 6.2 Array Definition Question (Program code area full)
Posted by mshep on Wed, 19 Apr 2006 19:10:16 GMT

Hi Bob,

Thanks for the quick response and sugguestions.

For my current application it is probably the best to just write out
the arrays into a file and then read them in. However, I just wanted to
let you know that your suggestion of using the existing perl script to
write a main level IDL code with the defined arrays is also a very good
approach that I had not thought of previously.

Thanks again,
Mark
