Subject: more SAVE problems

Posted by Liberum on Fri, 21 Apr 2006 17:48:41 GMT

Hi All,

I am using IDL6.2 on a Linux machine.
I am having problems with the following save command:

str = "path" + "filename.sav"

SAVE, /ALL, /VARIABLES, FILENAME=str

But when I look in the directory given in path, there is no saved file.

THis is an example taken straight from the book.

What is wrong?

Any help will be greatly appreciated.

Sincerely,
Sheldon
