Subject: Re: map_set stereographic projection
Posted by David Fanning on Fri, 28 Apr 2006 23:06:20 GMT

Folks,

I've written a short article on this topic, which you can
find here:

  http://www.dfanning.com/map_tips/precipmap.html

I'm especially interested in debugging this code, so
read it quickly. :-)

In addition to the interesting topic of fitting a map
projection to an image (which I'm sure you know is just
the *opposite* of the way IDL normally does things), I
show you how to use my COLORBAR routine to display
a non-linear color scheme. (I knew it could do it,
I just didn't know how!)

Flail away!

Cheers,

David
