Newsgroups:com.lang.idl

try the following program

```
pro teststruct
a={intnumber:0}
help,/structures,a
return
end
```

```
** Structure <3f3848>, 1 tags, length=2, refs=1:
  INTNUMBER    INT        0
```

```
pro teststruct
a={floatnumber:0.0 }
help,/structures,a
return
end
```

```
** Structure <3f3848>, 1 tags, length=8, refs=1:
  DOUBLENUMBER  DOUBLE    0.0000000
```

```
pro teststruct
a={ intnumber:0,doublenumber:0.0d }
help,/structures,a
return
end
```

```
** Structure <3f3848>, 2 tags, length=16, refs=1:
  INTNUMBER    INT        0
  DOUBLENUMBER  DOUBLE    0.0000000
```

notice the length=16
it should be 2+8=10
what is wrong?
