Hi, Mark !

May be it's not a new for you, but there are some lossless codecs (I have not tested it yet):

http://www.compression.ru/video/ls-codec/index_en.html (you can found some comparision of lossless video codecs there)

<http://neuron2.net/www.math.berkeley.edu/benrg/huffyuv.html>

<http://www.divx-digest.com/> (try to search "lossless")

Best regards,

Oleg
