RSI would like to take this opportunity to inform the IDL and ENVI user communities of a change in our corporate name. As of May 15, 2006,

we will begin doing business as ITT Visual Information Solutions.

Although the name of our company is changing, our commitment to providing you with the highest quality remote sensing, image processing, data visualization and analysis software and services will remain the same. We will continue to develop IDL, ENVI, IAS and other complementary products and offer a full compliment of educational, support and consulting services.

RSI became a wholly owned subsidiary of ITT Industries in March 2004. This name change allows us to leverage the strength of our parent company to expand our products and services offerings. The name change does not affect our operations, the services we provide, or our commitment to IDL, ENVI and IAS. Providing solutions to our customers -- whether by providing software or expertise -- remains our top priority.

Our new web site address will be www.ittvis.com, and over the next few days electronic mail addresses will change to be the same name convention we have now + @ittvis.com. URLs and e-mail addresses using the rsinc.com domain name will continue to function, and will be automatically redirected to the new domain.

The company name change will be reflected in our products and their documentation over time, as new versions are released. Specifically, the IDL 6.3, ENVI 4.3 and IAS 2.2 releases do **not** incorporate the new company name, but future releases will. The names of our products will remain the same as always.

Thank you for being part of the RSI user community. As ITT Visual Information Solutions, we look forward to providing you with the same high quality software technologies and services as we have for 29 years as RSI. If you have any questions, please feel free to contact your sales

representative or our support team at info@ittvis.com.

Sincerely,

Bill Okubo

Peg Shippert

IDL/IAS Product Manager
