Won't this always be 1.0 ?? :o)

You can try something like,

```
partA = (b1*coef[0,1] - b0*coef[0,0])*mask
ndviimg = (b1*coef[0,1] + b0*coef[0,0])*mask
Idx=WHERE(ABS(ndviimg) GT 0.0, Count, $
          COMPLEMENT=Zeroldx, NCOMPLEMENT=ZeroCount)
IF (Count GT 0) THEN ndviimg[Idx] = partA[Idx] / ndviimg[Idx]
IF (ZeroCount GT 0) THEN ndviimg[Zeroldx] = -1000.0
```

I think there's a faster way to do this though. Probably using HISTOGRAM. :o)
