yep, that was it. I think is not clear from the homepage of GDL that the devel libraries are also necessary. I had the same problem with ImageMagick, where I had to install not only

ImageMagick-devel

but

ImageMagick-c++-devel

But, here we are! Let's give it a try.

BTW, is this the right Groups to ask questions on GDL or there is another place, e.g. a Forum?

Thanx,

Andres
