Hi ,ALL,

How can i save my picture in full data size in IDL.

The size of data is 2400*1800, but it is slowly to show full size in draw window,

so i set the draw window's size is 800*600 and use the keyword: app_scroll,

now the image shown in window is part of the full image , and i draw grid and vector overlap the image.

But now i want to save the full size of image,How can i do this?

thanks!!!
