I guess I forgot to mention that this was sample code, somewhat simplified with what I was trying to do. I actually have 3 choices, with values 1,2,4 (not just the 1,2), it might be expanded further. The boss-man isn't sure yet how many there will be.

So you see I couldn't *quite* use the return index or some manipulation of it . . .

Again, you've been a great help, and I appreciate it.
